The Occupier

Dear Sir/Madam

Green Routes Scheme – Deep Lane/Grange Lane, improved crossing point

The City Council is aiming to develop a number of cycle routes throughout the city to improve conditions not only for cyclists but for pedestrians and wheelchair users. One such facility identified for improvement is the Deep Lane/Grange Lane crossing point which is connected to the Blackburn Valley Cycle Route.

Enclosed with this letter is a plan showing the proposals for the crossing improvements, the intention is to narrow the road at this point which will improve the visibility for all users and also reduce the distance which they have to cross. (Please note, the road at this point will still be wide enough to pass two cars).

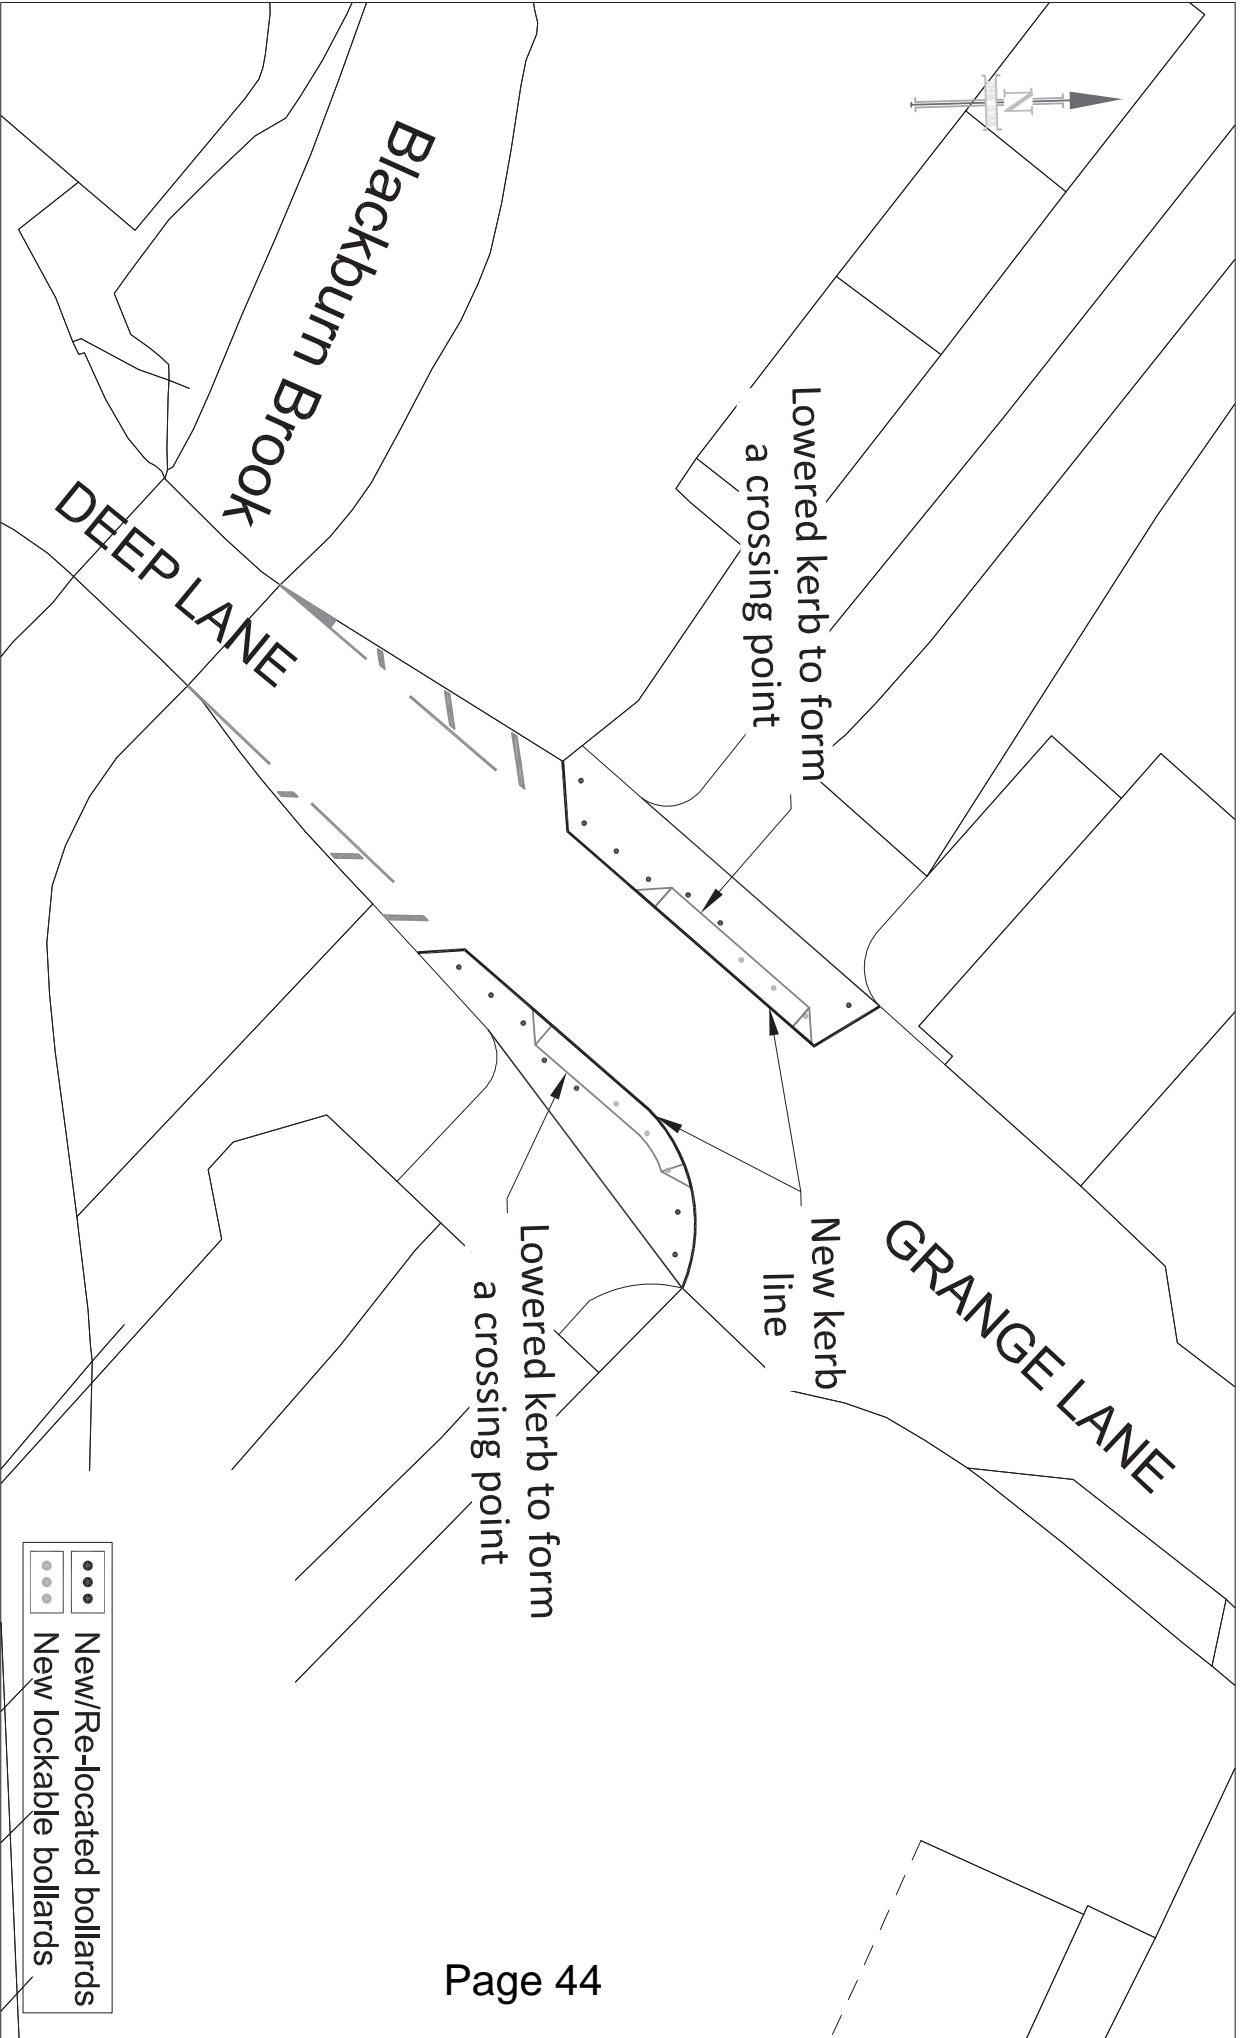

Although the main aim is to improve conditions for users it is also hoped that the reduced road width will help slow drivers as they pass through the area, which in turn will improve the situation for all local residents/business owners.

I hope that the attached plan is self-explanatory. However, if you need any further assistance please feel free to contact me. Please note that the consultation period ends 21st November 2014, please let me have your support or objections before this time.

Yours faithfully

James Haigh
