

# Green City Partnership Board

# Zero Carbon Commission

- Tyndall report – 16 mt CO<sub>2</sub>
- Net zero carbon by 2030
- Develop a Zero Carbon Plan
- Commission the evidence base

# Zero Carbon Commission

- Detailed GHG baseline inventory
- Gap analysis
- Options and interventions for achieving net zero emissions
- Climate Governance
- Timescales and stakeholder engagement

# Economic Action Plan

# Context

- The economic impact of COVID
- People: Health; unemployment; skills; demographics
- Place: Transport; high streets; outdoor spaces
- Business: Sector impact
  
- Timescales
- Non essential shops opening next week
- Pub gardens 22nd June
- Self catered accommodation 4th July
- Schools?

# Local response

## SCR response – Renewal Action Plan; Strategic Economic Plan (SEP)

### Sheffield response

- Iterative
- Economic theme of the Council's Recovery Plan
- Working with the Business Response Group
- Framework focusing on what we need to do for people, business, place
  
- Structuring our response around three phases:
  - Relief – immediate actions to keep business solvent and able to trade during severe restrictions on economic activity
  - Recovery – helping businesses and communities adjust and adapt to a new normal and overcoming the longer term effects of Covid 19
  - Renewal – ensuring long term structural weaknesses in the economy are addressed and a more sustainable, fair and higher value economy emerges

	BUSINESS	PEOPLE	PLACE
RELIEF	Access to Government financial support made as easy as possible	Matching of new demand for employment to those who are unemployed	Pop-up cycle lanes
RECOVERY	<b>Businesses supported to implement social distancing guidelines</b>	<b>Measures to address unemployment as furlough scheme is wound down</b>	<b>Social distancing on public transport and promotion of active travel as people return to work</b>
	<b>Reassessing supply chains to improve resilience and local benefits.</b>	<b>Address gaps in employability for young people</b>	<b>Retrofitting housing as a measure to get housing market moving</b>
RENEWAL	<b>Promote, support and incubate new start-ups</b>	<b>Sector based employability programmes for those sectors needing to recruit (eg. care, construction)</b>	<b>Promote Sheffield as a place to visit, particularly within the context of restricted international travel.</b>
	<b>Stimulating demand: Initiatives to attract businesses to invest locally (re-shoring) and new private sector investment.</b>	<b>Targeted training for employees in (low skilled, low paid) work to adapt to changing requirements (eg IT and working from home)</b>	<b>Assess long-term infrastructure plans for the city to take account of the economic shock.</b>

# Recovery and climate

- Lockdown forced behaviour change - reductions in emissions and pollution during lockdown both from transport and industry
- But the abrupt nature of the lockdown means this isn't long term or sustainable change eg. Sheffield is now back up to 68% of normal traffic levels.
- Immediate challenge is getting people back to existing jobs.
- But we also need to think about our longer term vision for the city.

# What is your view?

- This plan is iterative and there will be a number of versions. This is not the only opportunity to inform the plan.
- GCPB is one of a number of consultees, asking for views at an early stage
- What message does the GCPB want to feed into the city's recovery plan?
- What do they think the areas of focus should be?
- Are there specific interventions you think need to happen?
- This is a city plan, not a council plan - how can partners help?
