We need to build on our Target Operating Model to develop coherent pathways for care and support for people with primary care and community partners, and work with all our partners, and citizens of Sheffield and Carers, to establish joint approaches to quality, and improving outcomes for the people of Sheffield. We want to develop ways of working that recognises individuals' strengths and assets and enables and supports people to live independently in their home to create the future foundations for managing demand and enabling people to self-manage through access to the right information and advice.
