- Jeff Perring, Medical Director, Sheffield Health and Social Care NHS FT
- Josie Soutar, Managing Director, Sheffield Flourish
- Liz Tooke, Head of Commissioning/Commissioning Manager, MHLDDA, NHS South Yorkshire ICB – Sheffield Place

Introduction

The 'profile' of mental illness and wellbeing has continued to increase both locally and nationally, however the statistics remain stark and there is extensive evidence outlining the burden of both morbidity and mortality that comes with mental ill health. Among people under 65, nearly half of all ill health is mental illness. In other words, nearly as much ill health is mental illness as all physical illnesses put together. Mental illness is generally more debilitating than most chronic physical conditions. On average, a person with depression is at least 50% more disabled than someone with angina, arthritis, asthma or diabetes. Mental pain is as real as physical pain. Yet only a quarter of all those with mental illness are in treatment, compared with the vast majority of those with physical conditions. And more disturbingly nearly 50% of lifelong enduring mental illness has already established by the time a young person is 14 years of age and 75% by the time a person reaches the age of 20. Adverse experiences in childhood are devastating and can have lifelong effects.

There is a fundamental need to break cycles of inter-generational adversity and to build on Sheffield being a mentally healthy city, considering the impacts of the environment, isolation, housing, poverty, education and employment. People with serious mental illness die on average 20 years earlier than the rest of the population - mostly from preventable causes. Things have to change. We have a responsibility together with mental health services providers, the Local Authority, Public Health and society as a whole.

If you have a serious mental illness e.g. schizophrenia then you have:

- 2 times the risk of developing diabetes
- 2-3 times the risk of developing hypertension
- 3 times the risk of dying from CHD
- 4.1 times risk of dying prematurely.

What have people told us is important to them?

- Campaigns and education; that the city is comfortable and professionals trained to talk about mental health
- Greater response to the increasing complexity of need and demand for support – especially with cost of living crisis

Introduction continued

There is no argument or disagreement concerning this evidence base - it is stark and clear. There are also clear and compelling health and wellbeing economic arguments in terms of where to invest. The 'returns' however often surface in different parts of the system and sometimes not for many years. We do however have an implementation argument to 'win'. Despite good work that has started to target some of these inequalities, these vulnerable groups of people still experience poorer general health and die sooner than the rest of the general population. We understand why some of these inequalities exist:

- Unhealthy lifestyles are often not addressed and there is poor access and support to engage in physical activity.
- People don't participate in routine screening (lack of care co-ordination/reasonable adjustments and discrimination.)
- People not getting physical health checks and adequate management of long term health conditions or access to programmes (e.g. smoking cessation.)
- There are issues with not only the side effects of medication (e.g. anti-psychotics and weight gain) but often inappropriate use of medication and the lack of resources to deliver timely psychological interventions.

It's clear that there is a lot of knowledge and good work taking place in the city. However to ensure the best possible outcomes for people there is a continuous need to review practice to see what more can be done, how best practice can be shared and how disproportionate and targeted investments could and should be applied throughout our city.

Are we committed to 'Good emotional and mental health and wellbeing, for all, at every stage of life'?

-Dr Steve Thomas

What have people told us is important to them?

That services recognise the trauma people may have experienced and support those who have experienced disadvantage community, education and employment, support for carers and early intervention and prevention

Session Aim

To facilitate an interactive and informative development session for Sheffield's Health and Wellbeing Board focusing on mental health and wellbeing.

Session Objectives

- 1.To provide an overview of the current state of mental health and wellbeing across all age groups for Sheffield.
- 2.To discuss and identify the key challenges and barriers faced in improving mental health and wellbeing.
- 3.To explore potential solutions and strategies (including resource shift) for improving mental health and wellbeing for all age groups in Sheffield.
- 4.To facilitate networking and collaboration among participants to develop joint working approaches in promoting mental health and wellbeing across all age groups.

Session Outcomes

By the end of the session the Health and Wellbeing Board will:

- Have an increased knowledge of the current challenges related to the impact of mental health problems in Sheffield
- Be more equipped with up to date information to drive meaningful change
- Be able to identify and support key priorities for their area of influence & responsibilities
- Have generated innovative ideas to help address problems
- Have identified collaborative partnerships and mandated partners to work in new ways
- Have created a shared commitment to improve the mental health and wellbeing of the citizens of Sheffield

Agenda

Introduction

Introduction to the facilitators, housekeeping and plans for today's session

Context setting: informed by international and national picture

Video from Steve Thomas highlighting the importance of addressing mental health and wellbeing in a holistic manner

Showcasing what services and activities are currently developing and already offer

Video montage featuring various different health and social care settings within the primary care, secondary care, local authorities and VCSE organisations

Sheffield context: looking at individual experiences

Five different videos from people with a variety of lived experiences

Discussion

Break

Comfort break and exhibition

Challenges, barriers and aspirations

Discussion around challenges, barriers and aspirations within different providers

Q&A

Q&A with:

Alexis Chappell, Mark Cobb, Nicki Doherty, Mike Hunter, Margaret Lewis, Jeff Perring, Shatha Shibib, Rachel Siviter, Helen Steers.

Identifying solutions and strategies

Group discussions

Closing remarks

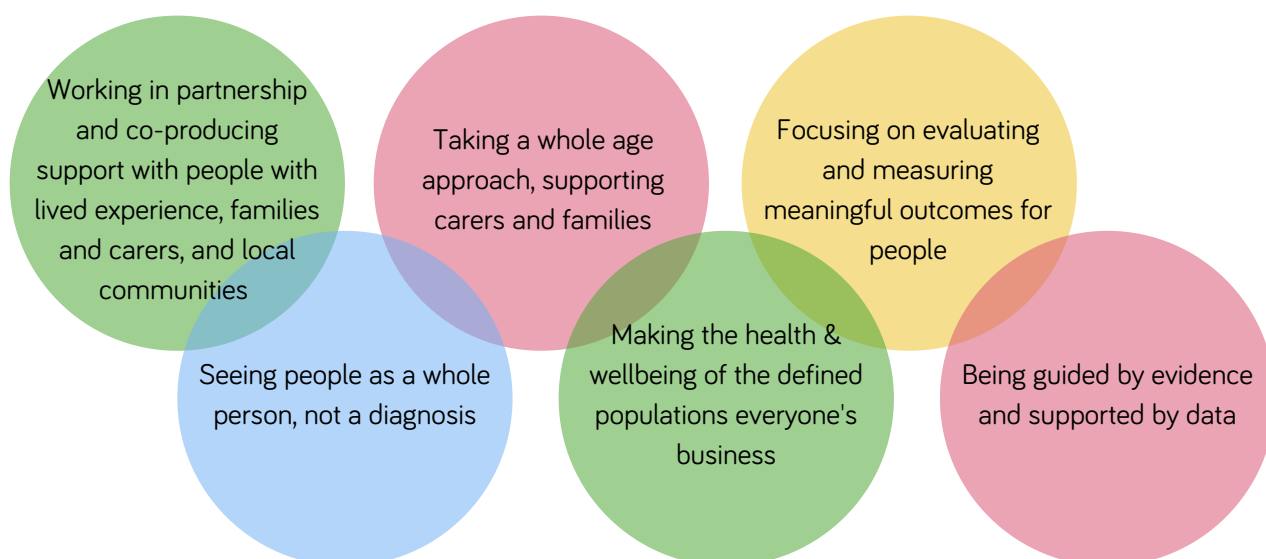

The Mental Health, Learning Disability, Autism and Dementia Delivery group background

The mental health, learning disability, dementia & autism delivery group was established to ensure strong strategic, cross-organisational leadership, whole system accountability and the delivery of agreed projects and/or programmes of work, and to champion a city wide approach.

The delivery group includes members from a variety of stakeholder organisations with the requisite knowledge, expertise, decision making authority and responsibility to improving the care of the populations served by the group.

The duty to collaborate, work in partnership and collective accountability underpin the mechanism by which the group fulfils its obligations.

The Guiding Principles

Promotion of Wellness; Prevention of Illness; Earliest Intervention; Recovery; Living Well

The Mental Health, Learning Disability, Autism and Dementia Delivery Group and Sheffield Health and Care Priorities

<p>1. Deliver on ambitious plans to tackle access, flow and reduce reliance on out of city placement</p> 	<p>2. Design an integrated, holistic approach to children and young people's mental health and social care</p> 	<p>3. Continue the transformation of adult community and primary mental health and social care</p> 	<p>4. Deliver the commitments of the Autism Strategy and refine the diagnostic pathway (for neurodevelopment)</p> 
<p>5. Recommission learning disability community services and right-size inpatient services</p> 	<p>6. Deliver the commitments of the Dementia Strategy, including memory assessment pathway</p> 	<p>7. See a transformation in substance misuse services</p> 	<p>8. Continue to grow and develop the VCSE sector, working together to address health inequalities</p> 

Discharge and Home First:

Same day access

MH Crisis

Neurodiversity

Building a model neighbourhood

Sheffield Place Plan - Proposed Priorities

	Discharge and Home First	Same Day Access to Care	Mental Health Crisis (all age)	Neuro-diversity	Building a model neighbourhood
Why is this a priority	Significant challenges in our discharge pathways which is an impact on hospital flow and patient experience	Significant challenges in levels of presentation in ED, ambulance handover delays & demand on primary care along with levels of occupied beds	Challenges in achieving core standards due to increase in demand and presentation in ED for people in crisis that impacts on exp & outcomes & an opp to deliver alternative models of support	The neurodiversity service has received more than double the number of referrals compares to 18/19 and 19/20 increasing in demand which has a significant waiting time for patients	To address the health inequalities experienced by communities residing in the north-east of the city, where we have the highest levels of deprivation and poorer outcomes
Objectives	To work together to reduce delays in discharge, implement home first principles across the city including roll out of the optimum model for D2A including acute, community and adult social care	To develop a new model for same day care that delivers the national ambitions and enables our communities to access the right service based on need	To ensure there is 24/7 access to mental health crisis support for children, young people and adults	To work jointly to improve waiting times to access services as well as ensuring we have a variety of support offers for patients post diagnosis	To work with our local communities in the north east of the city to develop a neighbourhood model which best supports their needs
How will this support our communities	Improve patient exp & outcomes through appropriate & timely discharge in patients own homes	Will result in shorter stays for patients and unnecessary delays in leaving hospital to elp improve access to ED and primary care on the day flow	Delivery of a more person-centred, responsive and supportive service whilst improving the response times to age-appropriate services to those in MH crisis	Faster diagnosis & support for children, young people and their families improving experience and outcomes	Improve health outcomes, patient experience and the overall health and wellbeing for our local people
Delivery groups	Urgent and emergency care	Primary Care and Community	Mental Health, Learning Disabilities and Autism	Community Development and Inclusion	
		Planned and Elective Care			
	Improving population health and reducing inequalities				
Our golden threads	Focussing on access and outcomes

National and local mental health statistics

Mental ill health represents 28% of ill health that the NHS deals with and is the largest single cause of disability. However, only 1.3% of England's health budget is spent on mental health

138,000 children, young people and adults in Sheffield will experience a mental health problem each year. Half of all mental health problems are established by the age of 14, rising to 75 per cent by age 24

One in four 17-19-year-olds in England had a probable mental disorder in 2022 (up from one in six in 2021). Positively, uptake from BAME communities using the Kooth service increased from 17% in 2020 to over 23% in 2022 due to targeted local engagement work

It is estimated that up to 20% of women will experience mental health problems during the perinatal period

It is estimated that 15,000 Sheffield children and young people live with a parent who lives with a mental health disorder. Many will be young carers

An estimated 1.25 million people have an eating disorder in the UK, and they can be complex and life-threatening mental illnesses

The proportion of homeless people in Sheffield with a diagnosed mental health condition (63%) is over double that of the general population (around 25%)

South Yorkshire and Bassetlaw has a higher suicide rate than the England average

In England in 2017/18, rates of detention under the Mental Health Act were over four times higher for Black/Black British ethnicity than White British ethnicity

300,000 people in work with a long term mental health condition lose their jobs every year

The average life expectancy for someone with a long-term mental health illness is at least 15-20 years shorter than for someone without (from preventable causation)

There are approximately 7,000 people living with dementia in Sheffield – just over 1% of the whole city's population

How common is mental ill health in Sheffield?

In Sheffield, 90 thousand people experience depression and/or anxiety and only half of those cases are recognised. Only half of those recognised are treated

16,000
complex trauma

acute hospital out-patients
have no organic cause

5,000
severe and enduring
mental illness

loneliness is as big a
killer as smoking

life-long illness established
by the age of 14

as many black people are
diagnosed with schizophrenia
compared to white people

suicide- leading cause of death for men under 50

How common is mental ill health?

Around 300 people out of 1,000 will experience mental health problems every year in Britain

230 of these will visit a GP

102 of these will be diagnosed as having a mental health problem

24 of these will be referred to a specialist psychiatric service

6 will become inpatients in psychiatric hospitals

For a typical GP list, with a size of 2,000 people this looks like:

- 352** Common Mental Illness
- 350** Sub-threshold psychosis
- 176** Personality Disorder
- 125** LTC & Co-morbid mental ill health
- 120** Alcohol dependent
- 100** Medically Unexplained Symptoms
- 60** Drug dependent
- 8** Psychosis

How common is mental ill health?

How common is mental ill health?

Health and Work Spotlight on Mental Health

In 2015, some **48%** of **Employment and Support Allowance recipients** had a **'Mental or Behavioural disorder'** as their primary condition

Each year mental ill-health costs the economy an estimated **£70bn** through lost productivity, social benefits and health care.

Of people with physical long term conditions, **1 in 3** also have mental illness, most often depression or anxiety

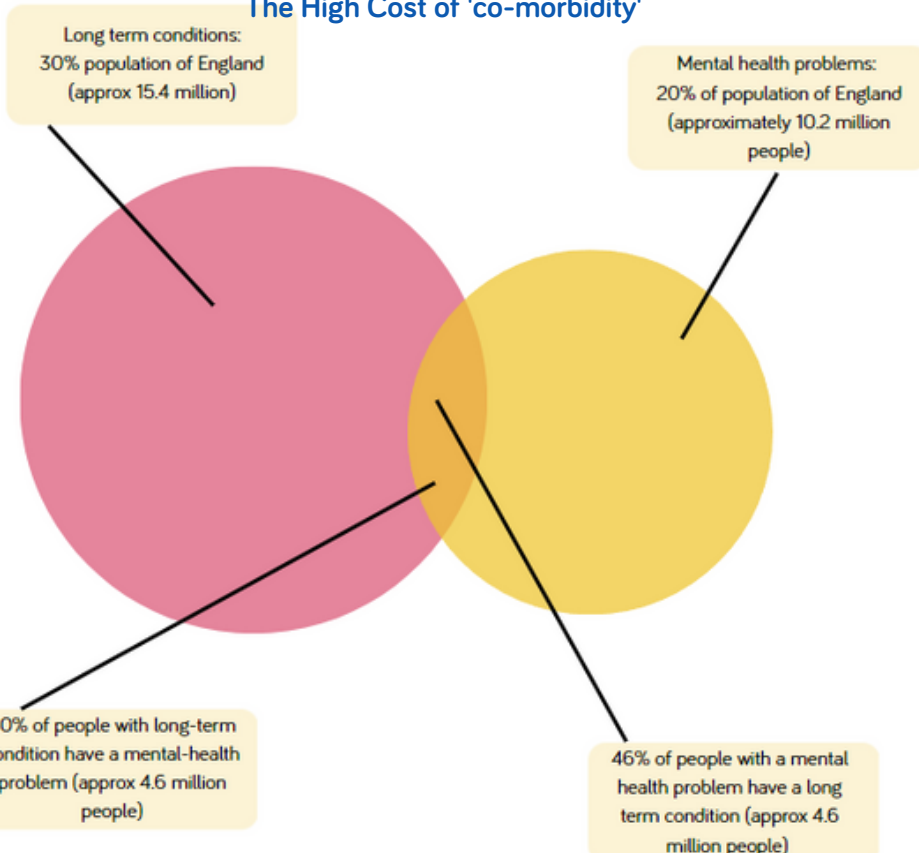

Work can be a cause of stress and common mental health problems: in 2014/15 **9.9m days** were lost to **work-related stress, depression or anxiety**

In 2016, **42.7%** employment rate for those who report mental illness as their main health problem (Mental illness, phobia, panics, nervous disorders (including depression, bad nerves or anxiety). **Compared to 74% of all population**
